Company Profile:

Saudi Establishment for Safety Equipment (SESE)

Overview:

Founded in 1975, the Saudi Establishment for Safety Equipment (SESE) has been a leader in the supply and service of fire trucks, special- purpose vehicles, and safety equipment in Saudi Arabia. With nearly five decades of experience, SESE has built a reputation for providing high-quality firefighting vehicles and offering comprehensive service programs that ensure the optimal performance of firefighting equipment.

History:

SESE was established to meet the growing demand for fire safety products and services in Saudi Arabia. In its early years, SESE focused on supplying fire and rescue vehicles for both domestic and international airports. From 1975 to 1994, SESE delivered the majority of fire trucks to civil airports through its previous suppliers, Chubb and Simon fire trucks.

With a strong commercial foundation, SESE expanded into the industrial, domestic, and municipal markets, securing new business opportunities. The company's commitment to excellence has made it a trusted provider in the safety and firefighting sectors.

Exclusive Partnerships:

SESE is the sole agent for several world-renowned manufacturers, including E-ONE and Bronto Skylift fire trucks, as well as Hytrans systems for mobile firefighting solutions, in Saudi Arabia. These exclusive partnerships enable SESE to offer cutting-edge firefighting vehicles and equipment that meet the highest international standards.

Specialization:

SESE specializes in sourcing and supplying state-of-the-art fire trucks and equipment tailored to the diverse needs of the industrial and public safety sectors. The company also provides reliable maintenance and after-sales services, ensuring that its clients can maximize the longevity and efficiency of their firefighting fleets.

Mission:

SESE is committed to enhancing Saudi Arabia's safety infrastructure by providing innovative, durable, and high-performance firefighting vehicles and equipment. With a strong focus on service and safety, SESE ensures that firefighting teams across the Kingdom are equipped with the best tools to protect lives and property.

The Hytrans® System

Applications for multiple Industries

Worldwide used for day-to-day fire and flood fighting and has proven performance

- Fire fighting
- Flood deployment
- Cooling water supply
- Process water supply
- Shorter maintenance time
- Emergency unit during power failure

Cost saving effect

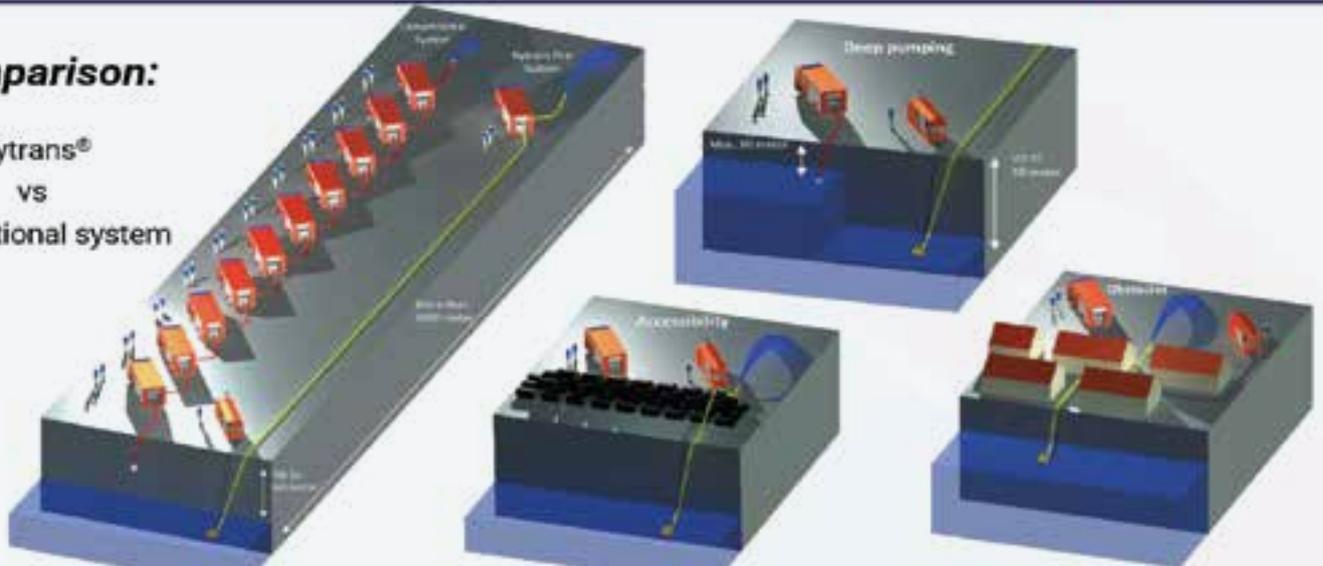

Long distance water supply

Comparison:

Hytrans®
vs
Conventional system

Hytrans® high volume, mobile water transport systems

A mobile and containerized system consists of:

- HydroSub®, a hydraulically driven submersible pump with power pack unit
- StrateLine® large diameter hoses, long distance
- Hose Layer Containers
- Monitors & PWSE (Portable Water Supply Equipment)
- AutoFlaker® and Hose Recovery Units

HydroSub®

Large diameter hoses, long distance

High-speed hose deployment

Monitor trailers & PWSE

Easy and safe hose recovery and storage

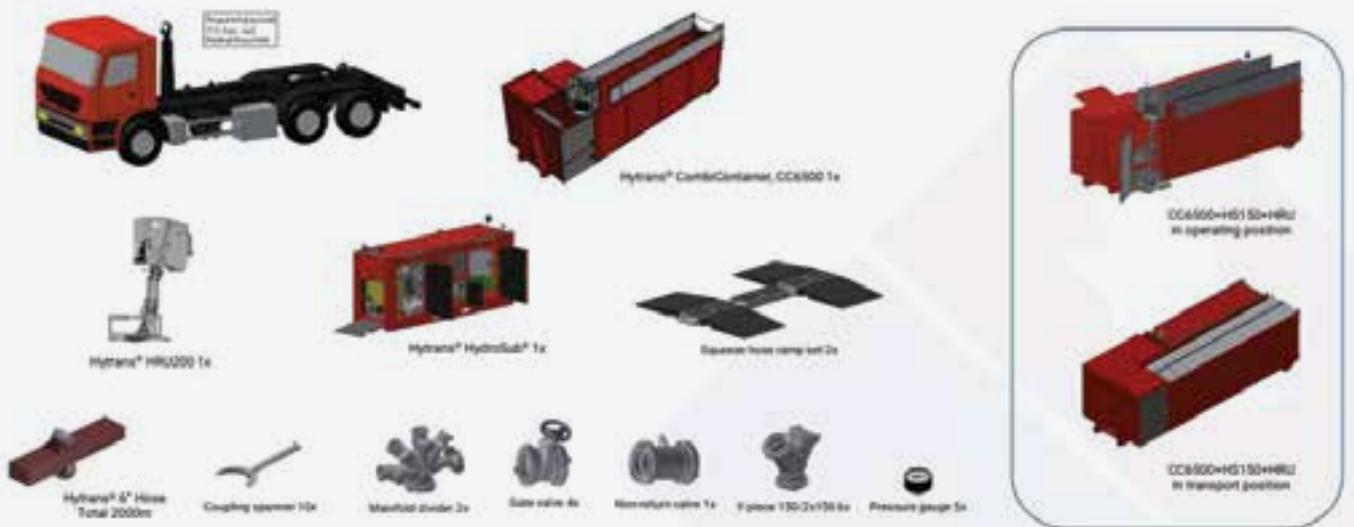

Making a Mobile System

Full System deployment

Basic System components

Hook Arm System

Multi Lug Coupling

Advantages:

- Flexible
- Small crew operation (2 person)
- Quick to deploy
- Minimal truck maintenance, no dedicated trucks
- One truck can handle different type of containers
- Commercial trucks can be allocated to assist

Mass Decontamination | Emergency | Response | Water Rescue | USAR
| Mobile Command Centre | BA Unit | Foam | Hose Layer

Sizes: 8" - 10" - 12"

- Standard on Hytrans® StrateLine®
- High pressure rating (tested over PN16 rating)
- Low weight
- Easy opening/dewatering due to patented chamfered lugs
- High impact resistant
- Only 5 degree twist
- Short axial length
- Solid clamp ring
- Single spanner needed

Mr. Mohammad Fostoc
Saudi Establishment for Safety Equipment (SESE)
P.O. Box 325201, Riyadh 11371
Saudi Arabia

Dear Mr. Fostoc,

We value our working relationship with SESE and look forward to continuing to meet your customers NFPA 1911 Aerial Device testing needs in the Kingdom of Saudi Arabia.

This letter is to confirm that UL Solutions will use Saudi Establishment for Safety Equipment (SESE) as our sole partner for all Fire Department Aerial Device inspections in the Kingdom of Saudi Arabia.

This document is provided to SESE based on their request and is valid from this date through the end of the 2025 calendar year. This letter shall be renewed based on mutual agreement.

We look forward to continuing to meet all your fire apparatus testing needs and growing our relationship with your company.

Sincerely,

A handwritten signature in black ink that reads 'Matthew Dandona'.
